The Reno MSA Business Activity, Construction, and Housing Indexes are created using the composite methodology introduced by the Department of Commerce and made popular by The Conference Board. All data variables are monthly, seasonally adjusted using the moving average method and all series reported in dollar terms are adjusted for inflation. All indexes, with the exception of the Construction Index, are based on data starting January 1995, with 1995=100. The Construction Index is based on data starting January 2001, with 2001=1000. The following variables are included in each index:

Reno MSA Business Activity Index

Reno MSA Business Activity Index increased 0.59% between May and June 2016, totaling 42 straight months of growth in business activities in the region.

The Reno MSA Business Activity Index provides a simplified picture of business activity in the Reno MSA region. While similar to our Reno MSA Leading Economic Index, this index excludes some local residential indicators and all national indicators to arrive at a local business activity index. As with the leading index, taxable sales data for this index is projected using average 12-month, year-over-year change for the variable.

The Index shows 0.59% increase between May and June 2016. The index increased by 7.42% over the same period last year (June 2015 and 2016). Business activity in the region increased for 42 straight months since December 2012.

Reno MSA Construction Index

Reno MSA Construction Index decreased by 1.72% between May and June 2016, the second month of negative growth in the index.

The Reno MSA Construction Index provides a picture of the performance of the construction industry in the Reno MSA region. Currently, no single variable represents the condition of the construction industry in the area. By combining multiple construction-related indicators into a single number, the Construction Index represents the state of the construction industry each month, allowing for comparison of trends in the industry over time.

The Index shows a 1.72% decrease between May and June 2016. The index decreased by 7.72% from the same period last year (June 2015 and 2016). June’s decrease in the index followed two months of positive growth in March and April 2016, a decrease in May 2016, and multiple fluctuations in the index in 2015 and early 2016, after a period of growth in 2013 and 2014.
